

LaSalle Streamlines Tech Integration, Staffing PMO and Security Teams

Healthcare

Contract Staffing

Technology

A leading healthcare company specializing in home and alternate-site infusion services. This organization delivers personalized care and a diverse range of infusion therapies nationwide. They aim to enhance patient outcomes and improve the quality of life through convenient, compassionate, and clinically advanced solutions.

GOAL

Streamline integration through quality of talent acquired to support PMO and security teams

CHALLENGES

- Merger integration required streamlined PMO processes
- Ensuring alignment and coordination amidst independence
- Optimizing integration efforts amidst merger complexities

OUTCOME

Within a three-month timeframe, we onboarded 12 project managers and 10 business analysts, facilitated by our collaboration with the Project Management Office (PMO). Through this partnership, we integrated three contract security analysts and one security manager into our team. Most notably, the longest tenured field employees were with this organization for 4.5 years before converting to full time employees, marking the longest tenure the company has experienced.
