LaSalle Network Streamlines Nationwide Cybersecurity Audit for Major Corporation

Manufacturing

Contract

Technology: Cybersecurity

A global multi-industry manufacturing leader that manufactures and sells industrial products and equipment in the United States and internationally.

NEED

A large corporation with hundreds of divisions across the US needed to conduct a comprehensive cyber hygiene assessment to ensure consistent security compliance across their entire network.

Managing this year-long project required a team of skilled professionals capable of:

- Overseeing the overall cyber hygiene assessment project and ensuring its successful completion within one year.
- Liaising with the third-party auditor company, facilitating smooth collaboration throughout the project lifecycle.
- Communicating effectively with leaders across seven corporate segments and numerous divisions to gather data and streamline the assessment process.

SOLUTION

Recognizing the unique demands of this project, this corporation partnered with LaSalle Network to secure the necessary talent. LaSalle quickly provided a team of highly qualified contract project managers over the course of the project.
